EDUCATION

University of Notre Dame | Notre Dame, IN May 2028
Bachelor of Science in Computer Engineering | Minor in Engineering Corporate Practice & Data Science GPA: 3.63
Data Science for Engineers | London, England July 2025 – August 2025
Honors: Recipient of full merit-based scholarship

EXPERIENCE

Aramco | Houston, TX May 2026 – August 2026
Cybersecurity, Governance, Risk & Compliance (GRC) Intern

- Conducted risk consultations & third-party risk questionnaire reviews for 15+ software, assessing AI-specific exposure
- Tracked compliance & reassessment status for 20+ software/service requests across enterprise Service Catalog with SME's
- Supported governance including IAM and SACS standards alignment, aiding audit and control effectiveness reporting
- Built 5 AI automation agents in Microsoft Copilot Studio, cutting manual GRC intake and follow-up tracking by 30%

McCloskey New Venture Competition | Notre Dame, IN February 2026 – April 2026
Calm Health AI Developer

- Collaborated with 4 teammates to develop Calm Health AI to optimize pharmacy transactions for 10k+ potential accounts
- Presented a 15-slide investor pitch deck covering financials and data security with research across 3 healthcare sectors
- Built a financial model projecting 30% lower transaction latency via ML-based prescription validation, reaching the finals

Pi-Squared | South Bend, IN April 2025 – September 2025
Software and Research Intern

- Developed and tested 3 interactive math game modes focused on financial literacy and logical reasoning for students.
- Analyzed 100+ user feedback from university students and educators to refine content difficulty, pacing, and game design
- Worked with the founder to develop social media strategies, increasing daily users by 80% to 200 within 3 months

PROJECTS

Data Club | Notre Dame, IN February 2026 – May 2026
Data Analyst for Meta

- Developed a MentalBERT-based multilabel classifier to detect harmful content across 2.7M+ anonymous posts on Whisper
- Fine-tuned transformer models to achieve an 86.4% Micro F1 & 81.8% Macro F1 on multilabel harmful-content detection
- Designed automated text processing systems using SetFit, regex & N-gram analysis for moderation across Meta platforms

Student International Business Council | Notre Dame, IN January 2026 – April 2026
Cuesta Partners Project Lead

- Led a 10-member consulting team advising a post-merger health-tech company on data integrity and operational challenges
- Evaluated 4 enterprise data platforms, recommending Fabric & a 24-month implementation roadmap with ROI analysis
- Built a RICE prioritization framework for 5 strategic initiatives affecting 10k+ clients & 5k employees, presented to CSuite

EY Tech Travel Team Consultant August 2025 – December 2025

- Assessed SAP S/4HANA, EAM & FSM tech for a global manufacturer, identifying gaps in maintenance, visibility & ops
- Designed an 18-month transformation map for 200+ franchises, covering integration strategy & KPI-driven deployment
- Presented an in-house built & unified SAP EAM-FSM ecosystem, projected to reduce unplanned downtime by 20%.

Notre Dame Venture Capital | Notre Dame, IN September 2025 – December 2025
Teamworthy Ventures Project Associate

- Conducted market diligence across 3 sectors, evaluating TAM, growth drivers, and vertical SaaS investment opportunities
- Analyzed PitchBook and IBISWorld datasets to identify 10+ market inefficiencies supporting venture investment theses
- Developed and presented a 3-company sourcing deck, synthesizing industry research into actionable investment insights

Data Science for Engineers | London, England July 2025 – August 2025
Student Researcher

- Processed 10k+ datasets using Python-based data science pipelines, generating insights through statistical analysis & visuals
- Built ML models utilizing PCA & classification algorithms, optimizing feature selection and predictive accuracy on datasets
- Performed bias detection and fairness analysis using Git/GitHub workflows to ensure reproducibility and collaboration

TECHNICAL & LANGUAGE SKILLS

Technical: AI Tools (Copilot, GPT, Claude & Gemini), Python, C, Bash, Linux, Java, CSS, HTML, VSC Microsoft Office 360 Suite
Language: English, Hindi, Spanish (basic proficiency)
