EDUCATION

University of Notre Dame | Notre Dame, IN — May 2028
Bachelor of Science in Computer Engineering | *Minor in Engineering Corporate Practice & Data Science* — GPA: 3.54
Data Science for Engineers | London, England — July 2025 – August 2025
Honors: Full merit-based scholarship recipient

EXPERIENCE

University of Notre Dame – UOES | Notre Dame, IN — October 2026 – Present
AI Sourcing & Systems Assistant

- Building an agentic AI solution that automates vendor and contract intake into one unified database for 100+ vendors
- Prototyped a unified vendor and contract data model in Snowflake, consolidating records from 3+ separate sources
- Set up OpenAI Codex for AI-assisted coding and handle ad-hoc system requests, cutting script build time by 40%

Aramco | Houston, TX — May 2026 – August 2026
Cybersecurity Governance, Risk & Compliance (GRC) Intern

- Conducted third-party risk management (TPRM) reviews and risk consultations for 15+ software, assessing AI risk
- Tracked compliance status for 20+ software and service requests with SMEs, supporting IAM and SACS alignment
- Built 5 AI agents in Microsoft Copilot Studio, cutting manual GRC intake and follow-up tracking time by 30%
- Designed integration architecture for an agentic AI HR cost-management tool, winning NextGen Capstone (1 of 10)
- Automated SAP-to-Power BI data flows with Power Automate, cutting weekly manual effort from 10 hours to 45 min

McCloskey New Venture Competition | Notre Dame, IN — February 2026 – April 2026
Calm Health AI Developer

- Worked with 4 teammates to build Calm Health AI, optimizing pharmacy transactions for 10k+ potential accounts
- Built a financial model projecting 30% lower transaction latency via ML prescription validation, reaching the finals
- Pitched a 15-slide investor deck covering financial projections, data security, and research across 3 healthcare sectors

Pi-Squared | South Bend, IN — April 2025 – September 2025
Software and Research Intern

- Developed and tested 3 interactive math game modes teaching financial literacy and logical reasoning to students
- Analyzed 100+ user feedback responses from students and educators to refine content difficulty, pacing, and design
- Partnered with the founder on social media strategy, increasing daily active users by 80% to 200 within 3 months

PROJECTS

Data Club | Notre Dame, IN — February 2026 – May 2026
Data Analyst for Meta

- Built a MentalBERT multilabel NLP classifier to detect harmful content across 2.7M+ anonymous Whisper posts
- Fine-tuned transformer models to 86.4% Micro F1 and 81.8% Macro F1 on multilabel harmful-content detection
- Built a SetFit few-shot auto-labeling pipeline with regex and N-grams, labeling 1.5M+ posts across 5 harm categories

Cuesta Partners | Notre Dame, IN — January 2026 – April 2026
Project Lead

- Led a 10-member Student International Business Council (SIBC) team advising a post-merger health-tech company
- Evaluated 4 enterprise data platforms and recommended Microsoft Fabric with a 24-month roadmap and ROI analysis
- Built a RICE framework prioritizing 5 initiatives affecting 10k+ clients and 5k employees, presented to the C-suite

Ernst & Young (EY) | Notre Dame, IN — August 2025 – December 2025
Technology Consultant

- Assessed SAP S/4HANA for a 200+ franchise global manufacturer via SIBC, finding maintenance and visibility gaps
- Built an 18-month Enterprise Asset Management (EAM) and Field Service Management (FSM) roadmap with KPIs
- Presented a unified SAP EAM-FSM solution architecture projected to cut unplanned equipment downtime by 20%

Data Science for Engineers | London, England — July 2025 – August 2025
Student Researcher

- Processed 10k+ record datasets with Python (Pandas, NumPy), generating insights via statistical analysis and charts
- Built machine learning classification models with PCA on 10k+ records, optimizing feature selection and accuracy
- Performed bias detection and fairness analysis on ML models, using Git/GitHub version control for reproducibility

TECHNICAL SKILLS

Programming: Python, C, Java, JavaScript, React, HTML, CSS, Bash, Linux, Git/GitHub, VS Code, Google Colab, Makefile
Data Science & ML: Pandas, NumPy, Matplotlib, Transformers (MentalBERT), SetFit, Natural Language Processing (NLP)
Cybersecurity & GRC: Third-Party Risk Management (TPRM), Identity & Access Management (IAM), Risk Assessment
AI & Automation: Copilot Studio, Power Automate, Power BI, SharePoint, SAP, Snowflake, Agentic AI, OpenAI Codex
Business Tools: Excel, Microsoft 365, PitchBook, IBISWorld, Financial Modeling | Languages: English, Hindi, Spanish (Basic)
